

There are two ways of storing Staron Sheets to avoid warping or sagging. Staron Sheets are most effectively stored at temperatures between 59 ~ 73°F (15 ~ 23°C ) and should be kept in a dry and well ventilated indoor area. Avoid exposure to moisture during storage. Staron Sheets should be stored flat and evenly supported as illustrated in.

*NOTE : Staron Sheets should be stored for easy access where Lot Numbers and Colors can be identified.*

Special care should be taken in storing Staron Sheets to prevent them from warping and sagging. Storage system, which allows easy accessibility, handling, and Lot identification, are the key. Exposure to moisture and direct sunlight during storage may damage the sheets. Staron Sheets should not be allowed to be stored in a wet environment.
